PROFESSIONAL PROFILE

University Technician in Computer Application Development, specialized in full-stack development for web and mobile applications. Experience integrating frontend, backend, APIs, federated authentication, databases, and cloud services. Focused on building clear, scalable, maintainable software solutions oriented toward an excellent user experience.

WORK EXPERIENCE

Full-Stack Software Developer | Unit0 Studio

October 2025 — May 2026

- **Contact Management Web Platform:** SPA for administering users, emails, and notes with unified Google OAuth sign-in.
- **Mobile Appointment Booking App:** Mobile solution for managing, registering, and viewing appointment history in real time with cloud persistence.
- **WhatsApp Cloud API & Chat UI:** Event server for receiving and sending messages via official webhooks, plus a modular chat-style interface for conversation retention.
- **Backend & Architecture:** Design and integration of cloud services, authentication, file storage, and APIs (GraphQL / REST) for multi-platform support (web and mobile).

FEATURED PROJECTS

Local Memory Map (PSE UNICEN Quequén): Interactive web app to explore memory sites in Quequén and Necochea. Choose a starting point, filter by thematic layers (murals, schools, clandestine detention centers), and open detailed cards for each place on a dynamic map.

Recipe Library with AI: App for importing and structuring recipes from URLs. Uses an AI model to extract ingredients and steps, transforming them into classic format and a CFE table, with later search by ingredients or cooking styles.

TECHNOLOGIES

Languages: TypeScript, JavaScript, Java, PHP

Web frontend: React 19, Vite, Material UI, Emotion, React Router, Angular, Apollo Client, HTML5, CSS3

Mobile: React Native, Expo, Expo Router, React Native Paper, React Native Maps, Reanimated, Gesture Handler

Backend: Bun, Hono, Node.js, Express.js, GraphQL Yoga, REST APIs, Webhooks, Spring Boot

Data & ORM: PostgreSQL, Sequelize, SQL, NoSQL, JPA/Hibernate, JPQL, JSON

Cloud & services: Firebase, Firebase Admin, Google OAuth, Google Cloud Storage, Google Analytics 4

DevOps & tooling: Docker, Docker Compose, EAS, Sentry, ESLint, Git, GitHub, Ngrok, Netlify

AI development tools: Cursor, GitHub Copilot, Google Antigravity, OpenAI Codex

Other: Google Maps JavaScript API, IntelliJ IDEA

EDUCATION

National University of the Center of the Province of Buenos Aires (UNICEN), Quequén

University Technician in Computer Application Development | 2022 — 2026

GPA: 7.79 · Status: Completed.

Systems Engineering | 2021 — 2022. Interrupted due to a change of study plan.

LANGUAGES

English: A1 level, basic technical reading.
